

If your machine is spinning the thread stand too quickly:

#1 remove nut under the stand plate

#2 Remove the spindle assembly

#3 Place spring in pre-drilled hole then reassemble Kwik Spinner

KWIK SPINNER ASSEMBLY:

Step #1

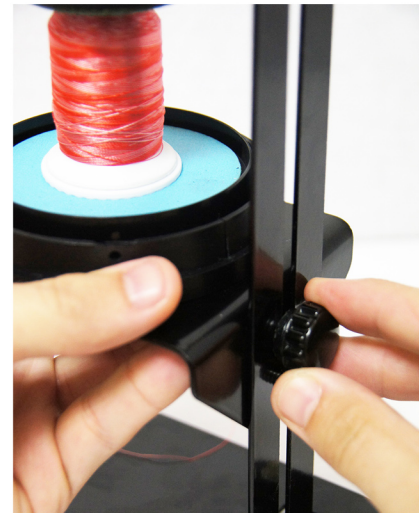

#1 Screw suction feet into four corners of the Kwik Spinner base from underneath and fasten with nuts.

#2 Place spool of thread and circle pad on spindle assembly then cover with clear guard and feed thread through the opening in the clear guard

#3 Adjust height of the stand plate by loosening nut then fastening once the plate is level with where the thread feeds into the sewing machine.

Step #2

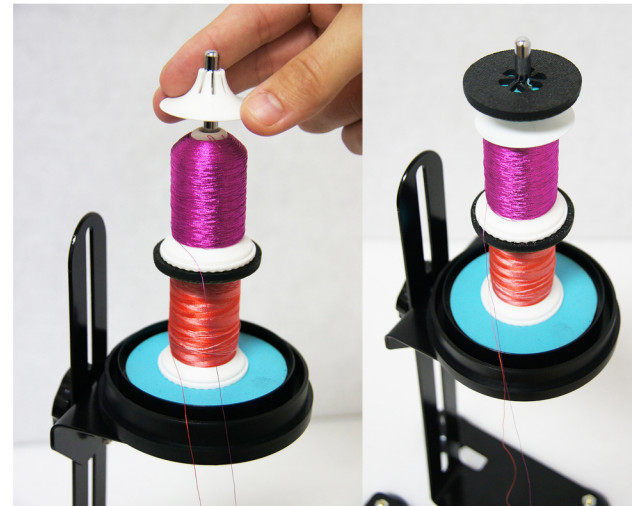

Step #3

For more information on our Kwik Spinners, please call Martelli Enterprises at 850-433-1414 or visit our website at martellinotions.com

Double Threading Assembly:

Step #1
Place second spool of thread on spindle assembly then cover with plastic guide and circle pad.

Step #2
Cover spindle assembly with clear guard and feed thread through opening
