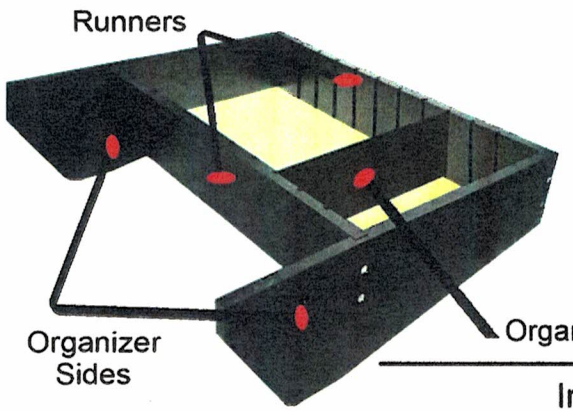
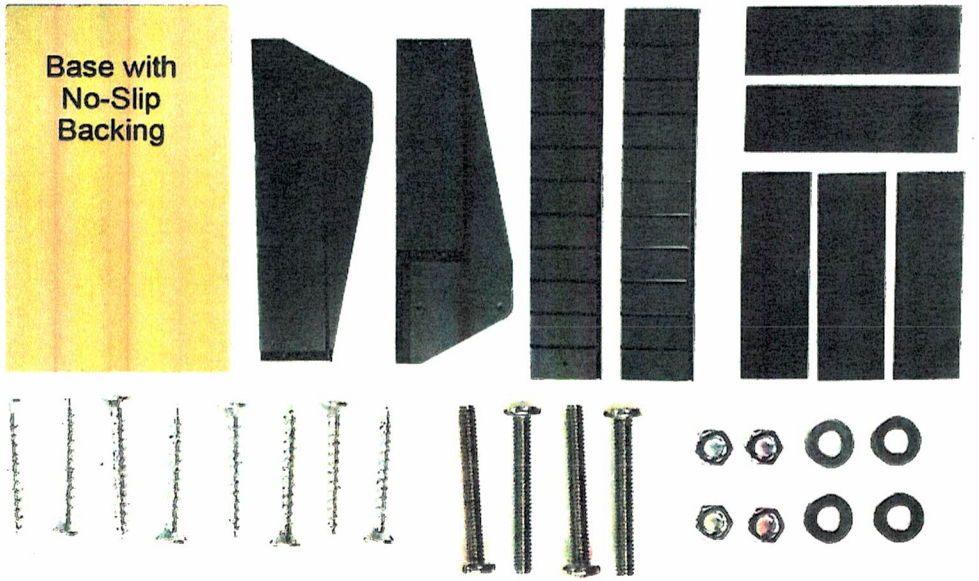
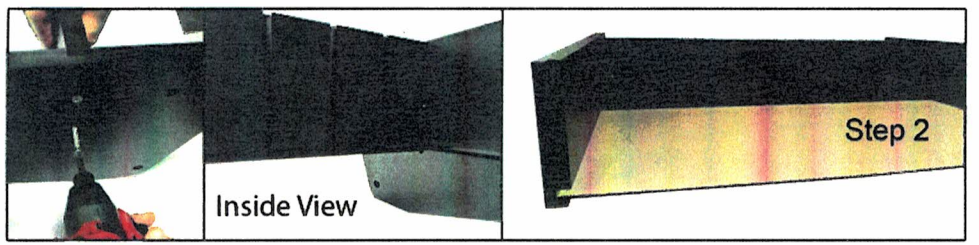
Martelli Template Organizer



Please insure all parts arrived with your template organizer. These parts include:
1 base with no slip backing
2 organizer sides
2 runners
1 bag of hardware
5 Organizer Divider Plates

Included Inventory:





Step 1:

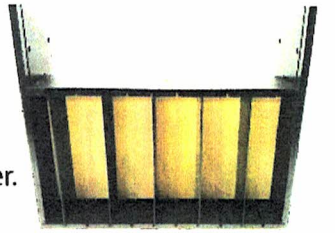
Use two screws to attach a runner to the end of the organizer that is nearest to the table mounting holes. Make sure that the grooves on the runner match the organizer side so that the base can later slide into the slot.

Step 2:

Attach the opposite organizer side in the same way with two screws. Now slide the No-Slip base into the groove.

Step 3:

Attach the remaining runner with two screws to complete the Template Organizer. Place dividers in slots if desired.



Step 4:

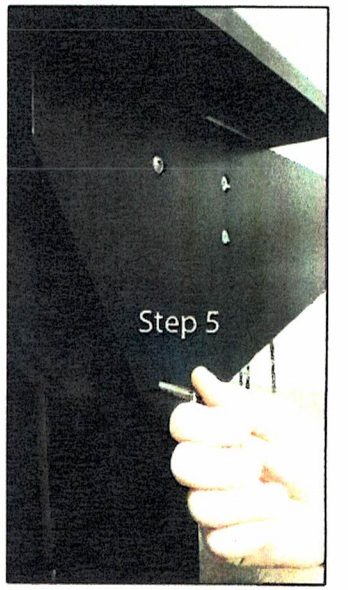
To begin attaching the organizer to your preferred side of the work station- slide the end of the organizer over side plate A or side plate B. It is easiest to line up the mounting holes while holding the organizer at a downward angle.

Step 5:

Next, insert one bolt on each side using a Philips head screw driver. Then level and align to insert the other bolt on both sides.

Step 6:

Finally, install one washer and one nut to each bolt on the inside of the C and D runners. Tighten the nuts using a screwdriver to hold the bolt in place and a 7/16" wrench to hold the nut.



Step 7: *Enjoy your organizer!*
