

WORK STATIONS

Thank you for selecting a Martelli Work Station!

We realize there are a multitude of tables on the market from which you could have chosen, and we are very grateful that you were confident enough to purchase ours.

Martelli strives to make the best tables on the market. That is why we hope you will feel free to offer any comments or suggestions. Throughout the years many of our products have been developed and indeed improved by our customer's input. This is the way we view it—our customers are a valuable member of our team and it helps us tremendously.

If you have questions or if there is anything we can do for you, please do not hesitate to give us a call at: **850-433-1414**

Warranty Information:

There is a 3 year warranty on actuator/electrical components.

There is a 10 year warranty on the Work Station. Warranties are voided upon improper use of table and/or table components (including, but not limited to: water damage to actuator/electrical components). A copy of the original receipt must be presented for warranty repair replacement work.

IMPORTANT NOTES: Before you begin, read all the instructions and any other literature included.

PLEASE NOTE: Before attempting to raise or lower your table check the leg assembly tension control knobs. Turn each of them counterclockwise to unlock the lift mechanism. For the table to raise and lower smoothly, keep them in the unlocked position. To lock down the table, turn them clockwise until tight. Do not raise or lower the table with the knobs in the locked position as this may damage the motor and void the warranty.

YOUR WORK STATION ARRIVES IN EASY-TO-ASSEMBLE MAIN PARTS.

YOU WILL NEED: **1.** Electric or battery operated drill driver
2. #3 Phillips bit (or a #2 if a #3 is unavailable) **3.** You may want to have an assistant to help in assembling your table.

To simplify the assembly of your LaCresta Work Station, the underside of your table top is pre-labeled. Using a blanket to protect your table and work area while assembling the work station is recommended.

You will also find the wheels and screws that you need to complete the Work Station.

STEP 1 ASSEMBLY INSTRUCTIONS:

Position the front/rear aprons

1A - Using a blanket or pad to protect all surfaces, carefully place the table top upside down on your work surface with the handles on left so it appears like the diagram. **1B** - Position the front and rear aprons into the precut slot on the table top, as shown in the diagram on the left, with the letters facing outward.

STEP 2 Attach Side Assemblies A&B to aprons

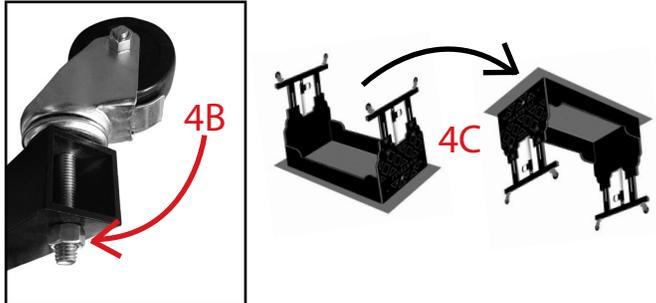

2A - Turn side plate A upside down and fit into the slot making sure the Martelli Logo is to the outside. **2B** - Attach side plate to the apron (at the corner where they meet) by drilling provided screws through the pre-drilled holes in the side plate assembly and into the apron. Tighten the screws firmly. Check that there are no misalignments. **2C** - Rotate Work Station and repeat steps **2A & 2B** with Side Plate Assembly B

STEP 3 Install Stabilizer Bar

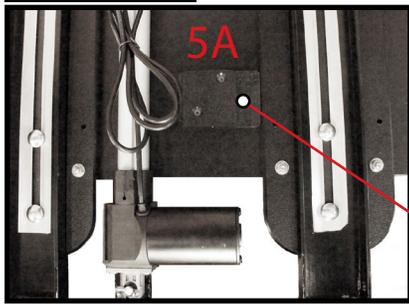

3A - Locate the unused 1/4" hole on Side Plate Assemblies A&B. **3B** - Position the stabilizer bar between the two leg assemblies (You may need your assistant's help to hold the stabilizer bar in position as you work.), and align the bar with the pre-drilled holes. **3C** - Attach pipe by drilling provided silver bolt through the side plate and into the stabilizer bar. Do not over-tighten. Repeat on opposite side.

STEP 4 Attach Wheels and turn your Work Station to an upright position

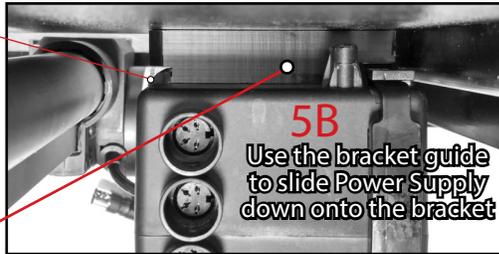

4A - Install wheels: Mount the two wheels with brakes on the front side of the Work Station (Side C). Mount the other pair (without brakes) on the back side (Side D).
4B - Tighten nuts to wheels to lock in place.
4C - **With the help of your assistant**, carefully move the table off your assembly area and place on the floor in an upright position.

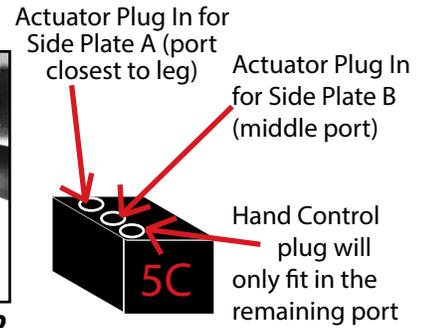

STEP 5 Attach Power Supply and Cable Connections

5A
bracket guide
Power Supply holding bracket

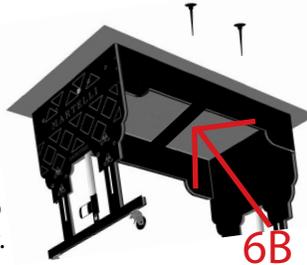

View looking Downward from Table Top

5A - Locate the Power Supply holding bracket on the inside of Side Plate A. **5B** - Slide power supply on to the bracket. **5C** - Plug actuator cord from Side Plate A into the power supply port that is closest to the leg. Plug actuator cord from Side Plate B into the middle port of the power supply. Plug hand control cord into the remaining port of power supply. **5D** - With a screwdriver slightly loosen the screws holding the clips to the rear apron. Place actuator cord from side plate B under the clips and retighten screws.

STEP 6 Attach Table Top and Center Support(s)

6A - Check that all wires are clear of the table's top edge. Place table top on table frame. Ensure that the front edge of table top is toward Apron C and handles are over Side Plate Assembly A. Set all table top screws halfway to make sure the table top is properly aligned- then tighten screws completely.

6B - Once table is assembled, hold center support(s) under table top with drill holes aligned and drill downward from table top into center support(s)

Hand Control

Hand Control Operation **Warning: - BEFORE** - attempting to raise or lower your table loosen the wing nuts located on side plates A and B. Turn each of them counterclockwise to unlock the lifting mechanism. For the table to raise and lower smoothly, keep them loose. To lock down the table, turn them clockwise until tight. Do not raise or lower the table with the wing nuts in the locked position as this may damage the motor and void the warranty. **Insert your cutting mat and ENJOY!**

The Ultimate Work Station — The Martelli Work Station

Work Station Shelf

Template Organizer

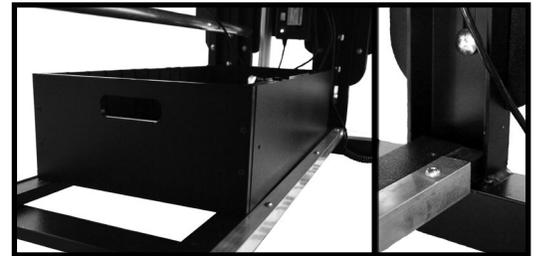

Organizer Dividers 5ct

Quilters need a premium work station, as do all practitioners of the sewing and crafting arts. Your work station is where you spend so much of your time. That's why we developed the Martelli series of adjustable work stations. With an adjustable height of 30" to 46" inches, our work tables are flexible enough to accommodate sitting or standing. You will now be able to use rulers and rotary cutters comfortably for longer periods of time and with greater accuracy. Our tables are precision engineered for easy assembly and enduring performance. Built for strength and durability with a heavy-duty sturdy aluminum reinforced frame and smooth 3/4" thick polyethylene (HDPE) work surface and side panels. Electric motorized leg-lifts ensure smooth and quiet operation.

Optional tools and accessories are available for all models.

Installation of **optional** Work Station Shelf

1. Loosen the wing nuts on the side plates and raise your Work Station to it's highest level.
2. Hold your quilt shelf by the shorter support rails with the two long rails on top of the short rails.
3. Lower the left side of the shelf so it will fit diagonally between the metal legs of side plates A&B.
4. Set the two long rails into the two vertical channels of the black metal leg.
5. Align the right side with the channel on the other leg.
6. Lower the right side of your shelf until both long rails are resting on the lower leg supports.
7. Return your table to the height you prefer.

Company History

For over 20 years, we have provided beginning and advanced quilters as well as other sewing and crafting enthusiasts with the tools and accessories to pursue their art and express themselves. Our company values innovation and continual improvement through the support of a dedicated research and development team. It really means something to offer a product that will be appreciated and recommended to others.

The Martellis are on the premises all the time to oversee the daily operations. The business began with four family members, and has now grown to include over 20 dedicated employees who are like an extension of our family. As a new generation steps up to serve our customers, we anticipate preserving this unique combination—a corporate business with a family mentality.

We provide a variety of ways to familiarize yourself with our products. Our website provides many demonstration videos, and we enjoy meeting our customers at trade shows and at our retail shop Martelli Quilting Solutions, located in Pensacola, Florida.
